

Health on the Move and AIM are committed to providing businesses and individuals with the information and tools needed to maximise their quality of life and achieve their health goals.

Our team of health professionals such as doctors, nurses, exercise physiologists, physiotherapists and occupational health and safety experts will assess your current health status and provide you with a Prevention Solution Plan designed to identify and help prevent health problems from occurring.

Health on the Move values its partnership with AIM and is pleased to offer members up to 25% DISCOUNT on all its services!!

E Health Risk Assessment

This is the ultimate online health tool, comprising of a one-on-one assessment, electronic report and access for 12 months to our online health portal, this assessment links you to the latest health advice, all at the click of a mouse.

Health Risk Assessment

This comprehensive assessment will provide you with effective, long term solutions to improve and maintain your health and wellbeing by addressing health risk areas affecting Australia's ageing population. Targeting cardiovascular disease, diabetes and injury risk, this assessment includes a detailed questionnaire, assessment and consultation.

Premium Essentials

Kick start your path to good health now by taking up this popular check that will provide you with a clear profile of your current health status. This assessment includes essential pathology screening, and a 30 minute results consultation with our General Practitioner, allowing ample opportunity to discuss all health concerns.

Premium Classic

This popular premium executive assessment will provide you with effective, long term solutions to improve and maintain your health and wellbeing by addressing health risk areas affecting Australia's ageing population. Recommended for individuals over 30 years, or those with family history concerns, this comprehensive assessment includes extensive pathology screening, a detailed medical questionnaire, medical consultation, bowel and prostate cancer screening and cardiac screening.

Skin Cancer Screening

Health on the Move has invested in SIAscope - a non-invasive technique that can view 2mm below the skin's surface to more accurately diagnose malignant melanomas. SIAscope is fully transportable making it ideal for personnel working outdoors in remote locations. Appointments are also available at our West Perth Clinic. The average full body assessment takes between 15- 30 minutes per patient.

So here's how...
